# LIGHT4EVS

## LIGHT WEIGHT CAR COMPONENTS FOR ELECTRIC VEHICLES

(GC.SST.2013-3. FUTURE LIGHT URBAN ELECTRIC VEHICLES)

### Objectives

Reducing the structural weight.

Exploiting new materials characteristics.

Developing and/or improving related production processes.

Carrying out of life-cycle analysis of the advanced materials.

Carrying out an economic analysis.

### Expected Impact

Developing a new materials for large-scale use in vehicle construction

Relevant environmental benefits of weight reduction

Overall reduction in time-to-market and development costs

Options for the use of globally available, recyclable and carbon-neutral materials

Extended lifetime of durable components of a vehicle and lower life-cycle costs
