# Involvement in the European Framework Programmes

# Who we are & what we do

**Applus IDIADA** is an engineering partner to the automotive industry providing complete solutions for product development projects worldwide

## Our assets:

### ⊕ Professional team

An international team of more than 1350 engineers and technical experts specializing in automotive product development

### ⊕ First class state-of-the-art testing facilities

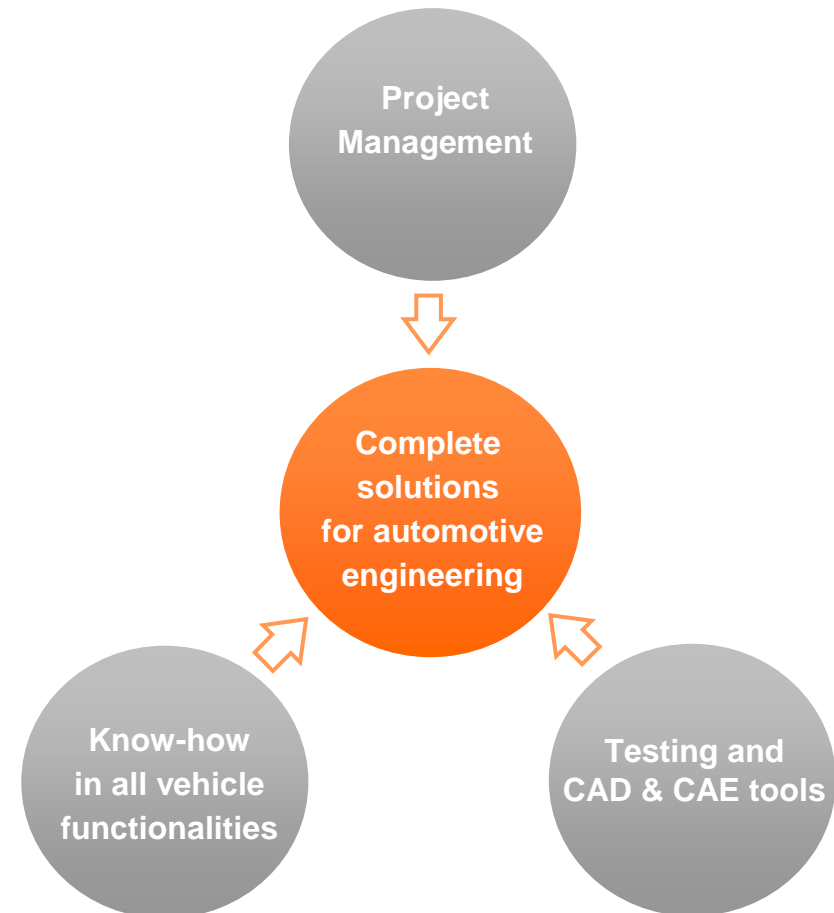

A modern comprehensive proving ground and leading-edge laboratories

### ⊕ International presence in 20 countries

Being close to our clients

### ⊕ Innovation

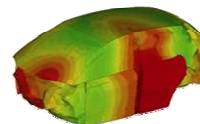

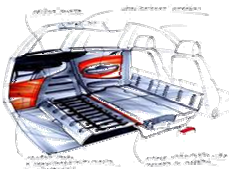

Continuously developing new services and technologies

## Development led by vehicle functionalities and performance

Comprehensive engineering capabilities for turnkey vehicle development projects at international level: Concept, CAD, CAE and testing of all major vehicle functionalities with unique in-house state-of-the-art facilities

### Main Vehicle Functionalities

Official homologation capabilities recognized in all markets worldwide

The most comprehensive independent proving ground

SST.2013.3-1 Managing integrated multimodal urban transport network

SST.2013.3-2 Implementing innovative and green urban transport solutions in Europe and beyond

SST.2013.4-3. Advanced digital human body models and virtual testing

SST.2013.5-3. Open in-vehicle platform architecture

SST.2013.5-4. Innovative, cost-effective construction and maintenance for safer, greener roads

SST.2013.6-1 Strengthening the research and innovation strategies of the transport industries in Europe

GC.SST.2013-1. Efficient, safe, convenient solutions for grid and road integration of the electric vehicle

GC.SST.2013-3. Future light electric vehicles

GC.SST.2013-4. Demonstration of electric buses as urban public transport

GC.SST.2013-5. Configurable and adaptable truck

GC.SST.2013-6. High efficiency energy conversion for future heavy duty transport
